OXFORD CORRIDOR

ABOUT US

As a young, globally-minded team, we create innovative learning experiences that bring together language, culture, confidence, and personal growth. We are committed to empowering students to think beyond the classroom, embrace new perspectives, and approach the world with curiosity and confidence.

OUR MISSION

Our mission is to create innovative educational experiences that inspire students to learn and grow beyond the classroom. At Oxford Corridor, we foster confidence, curiosity, communication, and a strong sense of global citizenship.

**“Quality education
for every student.”**

WHAT IS PREMUN?

PREMUN is Oxford Corridor's Model United Nations experience designed for primary school students. Through age-appropriate debates and activities, students develop communication, confidence, cooperation, and an understanding of different perspectives.

WHY PRIMARY?

Primary school is a key stage for developing communication, confidence, and social skills. PREMUN introduces these skills early through discussion, collaboration, and self-expression. It encourages students to learn, communicate, and engage with the world around them.

BUILDING SKILLS THROUGH OXCPREMUN

At OXCMUN, students learn by doing. Through debate, collaboration, negotiation, and interactive committee sessions, they develop public speaking, critical thinking, leadership, problem-solving, and decision-making skills while strengthening their English. Designed specifically for primary school students, OXCMUN turns these skills into a hands-on experience that encourages students to take initiative, express themselves, and engage with different perspectives.

CONTENT CAN BE DELIVERED, EXPERIENCE MUST BE DESIGNED

At OXCMUN, we have tailored a unique MUN experience specifically for primary school students, giving them the opportunity to debate, think critically, collaborate, and develop their English skills in an environment unlike anything they have experienced before. Every element of the conference has been thoughtfully designed to create a truly special experience for young learners. OXCMUN provides an opportunity to experience something new, discover new abilities, and become part of an experience they will not want to miss.
